DXNMedia Broadcast Monitoring Services

Due to popular request, we have started to provide broadcast monitoring services for local Free-To-Air television channels in Singapore.

We can spot how many times your TVC is on air per day, and we can also provide recorded clips and compilation of news or broadcasted segments about your product or branding campaign.

For intellectual property owners, we can help to spot any potential violation of rights in your works. (eg. To ensure fair use of library music, photographs, stock shots, dramatic works, literary works and other possible content.)

Current 24/7 channel monitoring:

- Channel 5 (*Transmission over DVB-T*)
- Channel 8 (*Transmission over DVB-T*)
- TV Mobile (*Transmission over DVB-T*)
- Channel News Asia (*Transmission over DVB-T*)

We can also monitor & record other local Free-To-Air analogue broadcast channels or other cable channels upon contracted to do so.

Our 24/7 broadcast monitoring services are available on a weekly, monthly or annual contract basis.
