Business Registration No.: 53109564M

## DXNMedia Audio

As part of our media production services, we offer the following audio solutions:

### - Location Audio for video / film

Package includes:

- 1) Location Sound Engineer
- 2) 3 Channel Sound Devices Mixer
- 3) Microphone Boom Pole
- 4) A variety of shotgun mics
- 5) Wireless microphone kit
- 6) Lavalier microphones

### - Live Recording / Field Recording

Depending on project requirements, we are able to provide on-location live-to-two tracks or multitrack audio recording services. (eg. Concert, speech, seminars, voice over / narration recording) For such applications, we offer our SACD / DSD quality 1-bit recorder for superior high resolution audio acquisition solution.

**- HDSLR Audio Recording Solution**

With the DXA-5D from Beachtek, we are able to provide a hassle-free professional audio recording solution that defeats the AGC feature in most DSLR cameras with video recording features.

Even when Canon's 5DmkII has new firmware to fix AGC gain riding, this device still provided better input option and control for HDSLR workflows.

In the case of running double-system, we can also supply a professional 2-track Fostex FR-2LE recorder for sync sound acquisition just like the traditional film acquisition workflow.

**- Compact 150w PA / Sound Reinforcement System**

We understand the pain and hassle of setting up large PA systems that weighs a ton when your project / event doesn't even require that kind of audio power output.

Coupled together with the fact that there are already many audio companies in the market supplying PA systems, we specialize in providing compact, micro-size audio systems that packs a punch without breaking your back and budget.

Our suitcase sized PA system comes standard with 5 channels 150w powered mixer and 1 wired microphone for basic speech presentation in a small venue.

We also supply options for wireless microphones, professional MP3 player for time-critical audio playback & cues, basic projectors, and we are also able to supply compact 450w AC generator for any outdoor events where getting AC power is not feasible or convenient.

### - Audio Post Production

We have an extensive library of pre-paid licensed music and sound effects and are able to provide narration, voice over recording, audio editing, mixing and post production services at very affordable rates.

### - Audio system acoustic tuning, Sound Level, Noise & RT60 measurement

Calibrating audio systems for concerts halls, studios, home theatres and many other venues to ensure an acoustically accurate sound reproduction.

We can be engaged to take noise level measurements and provide our evaluation report. (eg. Measuring noise levels of products or equipment for technical specifications literature, testing of product's noise level emission for compliancy to certain international safety standards, work site noise level monitoring, etc...)

We have provided numerous VO & location audio recording service for many Film & TV productions. Attached picture is shot during one of our shoots for a TVC starring local actress, Felicia Chin.
