

DXNMedia Production (Singapore)

We specialize in providing Standard / High Definition Production & Post Production support for a large variety of video requirements.

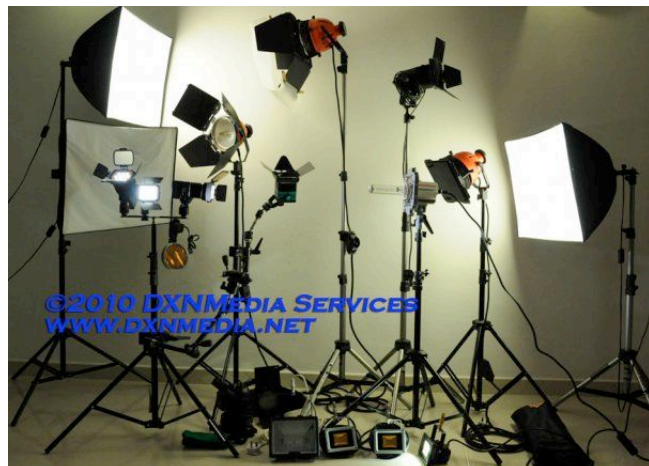

- Documentary
- Video News Reels (VNR) / B-Rolls
- Drama / Short Films
- Multi-Episode Television Series
- Music Video Production
- Live Multi-camera Event Coverage
- Corporate / Instructional Video
- Opening Graphics & Titles
- Television Commercials
- Editing / Amendments of footage
- Format Conversions
- Tape Transfers
- Voice Over Recordings
- Audio Post & Mixing
- DVD Authoring
- Chroma Key Studios
- Compositing / Special Effects Directing

With our own equipment capabilities, we are able to support most production requirements with well maintained gears that will not fail on-location.

- Compact Jib Arm
- 1000w tungsten 3200K Spot
- 800w tungsten 3200K Red Head
- 3200K Softbox
- LED & PL Lights

For studio applications, we have the capability to provide compact prompting system with our 8" Telescript teleprompter. We also have broadcast grade 17" portable monitors with Vectorscope and Waveform features and precision measurement tools for video and sound acquisition.

DXNMedia Post Production Services (Singapore)

As our main specialty is in broadcast video post-production, there is no compromise in the quality of service in this area.

- Online/Offline video editing for Standard or High definition materials
- Playback Support for *Digital Betacam, Betacam SP, SX & MPEG-IMX, DVCAM, HDV & HDCAM*
- Playback and Record support for *miniDV, DVCAM, BetaSP, HDV & HDCAM*
- Ingest & capture capability of 10-bit 4:2:2 Uncompressed for Standard Def.
- High Def ingest to Apple's 10-bit 4:2:2 ProRes for best quality & disk space.
- Decent library of Licensed music for use at reasonable rates
- Digitising, capturing and file encoding services
- Tape transfers & DVD Authoring.

All our post facilities are designed for mobility and are capable of field applications. We run the latest FCP and Avid systems on Macbook Pros with AJA hardware and portable RAID drives that can handle up to 10-bit 4:2:2 HD video resolutions.

We are constantly upgrading our capabilities and increasing our inventory of equipment to serve you better and meet current production trends. No matter how big or small your video production is, we will be able to support you in some ways or another.
